

Dear FCC:I benefit from listeing to XM Radio, and pay for it's service by my own free choice, due to its high quality and diversity of channels, including its traffic and weather channels. This is not available elsewhere in such a format, and since I pay for these services, I hold that it should not be up to the NAB to tell me or any other citizen what I am permitted to hear. I respectfully urge you, the FCC to reject the NAB petition 04-160. I also ask you to support XM radios ability to provide the programming that I demand and deserve. XM has been very responsive to it's listeners requests -- I for one have been very affected by their recent programming changes (for the better!!) and believe that they are very consumer-responsive, which is why I am taking the time to write this note. Please do not let more monopolization of the airwaves and media continue, as the NAB is attempting to do, in just one more area.
